

BETTER, FASTER, MORE RELIABLE IT WITH HYBRID CLOUD INFRASTRUCTURES

By leveraging hybrid cloud, leading organizations are truly getting the best capabilities of private cloud with the advantages of public cloud.

Companies with hybrid cloud are:

50%

more likely to have better application performance

43%

more likely to have succeeded in building an agile IT infrastructure

43%

more likely to have improvement in supporting multiple locations

38%

more likely to have seen a reduction in overall IT expenditures

35%

more likely to have reduced the amount of downtime they experience

as compared to All Others.

The bottom line: Organizations that leverage hybrid cloud are able to achieve significant benefits over businesses that have yet to deploy hybrid cloud, and they are able to build high-performing and reliable IT infrastructures that can drive their business now and in the future.
