To maximize protection, compliance, and ROI, organizations need security architecture that maps to their strategic objectives.

Yet often, achieving this alignment is easier said than done. The attack environment is always changing. Technology purchases are often made in silos, resulting in gaps and duplication. Or investments are made reactively, in response to the latest threats, rather than proactively for business objectives. And it’s hard for organizations to know if they’re getting the alignment right, especially given the complexities of today’s IT infrastructure.

Presidio offers a smarter solution. Our expert consultants will work with you to assess your security architecture’s current state. Drawing from industry and security best practices, we’ll give you a vendor-agnostic roadmap for architecture optimization, while ensuring alignment with the organizations goals.

A FULL STRATEGIC AND TACTICAL ANALYSIS
Presidio’s comprehensive guidance includes:

SECURITY ARCHITECTURE ANALYSIS: Security Architecture Analysis: A strategic and tactical analysis of your overall architecture, to ensure alignment with business, maturity, and industry best practices.

SEGMENTATION WORKSHOPS: A series of workshops to give your organization a realistic, vendor-agnostic, and prescriptive roadmap to tackle the challenge of segmentation.

FIREWALL ANALYSIS: Identifying weaknesses and optimizations within existing rule sets, with recommendations on how to enhance firewall deployment.

DEVICE HARDENING: Performing a detailed review of device configurations to evaluate your infrastructure’s security posture against industry best practices.

Throughout, we map every aspect of your security architecture to organizational strategy and business goals. You gain a clear view of your technology assets, and how to use them, plus guidance for future investments.
IN-DEPTH UNDERSTANDING OF THE OPERATING ENVIRONMENT

The cloud, Internet of Things, collaboration tools, data, and more—today’s security architecture encompasses an increasing degree of moving parts. Presidio’s experts are conversant in all of the technical details, for informed security architecture recommendations and remediation from end to end.

SKILL IN MAPPING TECHNOLOGY TO THE BIGGER PICTURE

Our team knows the business side of security architecture, too. We take into account your budget, business needs, culture, and strategic objectives to guide every recommendation.

We’re skilled in engaging decision-makers across your organization and in delivering solutions that work with all aspects of your operations.

EXPERT ADVISORS WITH YEARS OF EXPERIENCE

Experience is the secret to our success. Our security architecture teams include an unparalleled range of skills, including expert level certification from Cisco, VMware, and most all industry leading vendors. Coupled with security expertise and certifications, Presidio provides an insight to your environment unlike any other partner.

To ensure your security architecture supports your business, compliance, and cyber protection goals, call Presidio for an expert assessment and roadmap for the path forward.

LEARN MORE ABOUT PRESIDIO’S FULL SUITE OF CYBER SECURITY SOLUTIONS:

**ADAPTIVE STRATEGY**
Get expert guidance on cyber security strategy and governance, regulatory compliance, policy and procedures, security awareness and training, architecture and next generation risk management.

**ADAPTIVE TESTING**
Gauge risk and preparedness through vulnerability assessments, penetration testing, red & red/blue team scenarios and comprehensive security analyses. Check compliance with HIPAA, PCI, GDPR, (NIST Cyber Security Framework, NIST 800-53, NIST 800-171) and ISO 27001 regulations and standards, plus all 20 CIS controls.

**ADAPTIVE ARCHITECTURE**
Achieve a scalable security architecture/roadmap, including cloud and IoT security, through firewall analysis, device hardening, control recommendations, active directory analysis and PKI assessment.
Build and strengthen application, network, data, endpoint, cloud and physical security.

**ADAPTIVE SECOPS**
Get 24x7x365 next generation risk management that includes device management, threat intelligence and incident response, plus security event and information management that uses event correlation and analysis and machine learning technology.
