VMware Cloud on AWS connectivity and readiness assessment with Presidio Consulting Offer

Migrate and extend VMware environments to AWS

The VMware Cloud on AWS connectivity and readiness assessment service analyzes the customer environment in order to expedite and confirm the extension of a private cloud to AWS. This service is based on customer input, which is then used to develop a plan for deploying workloads to VMware Cloud on AWS.

Benefits

- Familiarization with VMware Cloud on AWS
- Clear implementation plan for optimal use of VMware Cloud on AWS
- Access to AWS ecosystem resources through VMware Cloud on AWS
- Workload flexibility to quickly meet various capacity needs

Customer contribution

- Participate in a project initiation call
- Make key stakeholders available for the project kickoff meeting
- Provide appropriate access to relevant systems
- Participate in a closure meeting

Key activities

Conduct a project kickoff meeting to establish expectations and review timelines

Assessment of your infrastructure to determine gaps between the current state and preferred end state

Create a technical gap analysis workbook and implementation plan document

Conduct a closure meeting to review findings and how they may affect the proposed implementation plan

Solution Space

Discover scalable and secure solutions that will empower you to achieve your business needs with Amazon Web Services (AWS) and AWS Partner Network (APN) Partners that have attained AWS Competency designations. Customer-ready solutions are based on architectures validated by AWS, include a combination of AWS services and APN Partner technologies, can be deployed quickly with solution accelerators like AWS Quick Starts, and feature optional consulting offerings provided by APN Partners, to accelerate your cloud transformation.
