

# NETAPP ALTAVULT CLOUD-INTEGRATED STORAGE

*Deploy as physical, virtual, or cloud-based*

## CHALLENGE

*Traditional backup and recovery solutions fall short because they are:*

- **TOO SLOW.** Users expect instant recovery and minimal data loss, but legacy backup and recovery strategies can't keep pace. As a result, many organizations fail to meet backup and recovery windows.
- **TOO EXPENSIVE.** As storage grows, companies struggle with the rising cost of protecting that data on the premises. Also, bandwidth costs and constraints become more acute with larger datasets.
- **TOO RISKY.** Many organizations still rely on tape, which increases risk exposure because of the potential for media lost in transport, increased downtime and data loss, and limited testing ability.
- **TOO COMPLEX.** With an ever-increasing number of critical applications to protect, along with complex backup architectures, multiple backup apps, and error-prone legacy technologies, backup is incredibly complex.

## SOLUTION

### BACK UP AND ARCHIVE DATA TO THE PUBLIC OR PRIVATE CLOUD

NetApp<sup>®</sup> AltaVault<sup>™</sup> cloud-integrated storage enables customers to securely back up data to any cloud at up to 90% lower cost compared with on-premises solutions. AltaVault gives customers the power to tap into cloud economics while preserving investments in existing backup infrastructure and meeting backup and recovery SLAs.

### ALTAVULT PHYSICAL APPLIANCES

AltaVault physical appliances are among the industry's most scalable cloud-integrated storage appliances, with capacities ranging from 32TB up to 384TB of usable local cache. Enterprises often deploy AltaVault physical appliances in their data centers to protect large volumes of data. These datasets typically require the highest levels of performance and scalability available. AltaVault physical appliances are built on a scalable and efficient hardware platform that is optimized to reduce data footprints and rapidly stream data to the cloud.

## KEY FEATURES

### EFFICIENT

Uses inline deduplication and compression for up to 30:1 data-reduction ratios.

### OPEN

Integrates with the backup software that you already use and with all leading public and private cloud storage providers.

### SECURE

Keeps data encrypted at all times, reducing risks to both security and compliance in the cloud.

### SIMPLE

Enables you to go from zero to cloud protected in less than 30 minutes.
