

PRESIDIO[®]

PUBLIC SECTOR

Public Sector organizations across all industries are challenging their IT teams to “transform” their programs by implementing advanced technologies to better connect employees, partners and customers in an increasingly on-demand marketplace. At the same time organizations are looking to technology to enable innovation, IT teams are being asked to reduce capital investments, deliver IT as a service and meet increasingly complex regulatory and compliance requirements.

DIGITAL TRANSFORMATION IS FORCING CUSTOMERS TO INNOVATE

Modernize infrastructure and applications

Cloud right

Security-as-a-platform

Multi-vendor

Monetize Data

Operational efficiency

Tailored SLAs

Financial visibility and options

PROPRIETARY APPROACH:

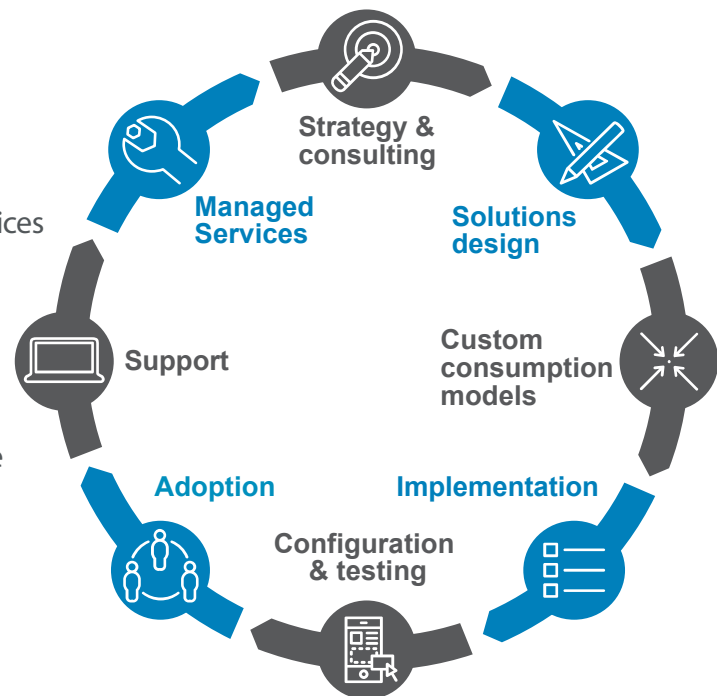

We offer end-to-end solutions from design through deployment and ongoing services

Our lifecycle approach

- End-to-end lifecycle solutions, not point products and services
- 100% custom solutions and deployments to fit your unique requirements
- One dedicated **Public Sector** relationship manager to ensure integration across all solution areas
- A local delivery model with all the benefits of national scale

Engineering Ratio

We deliver great outcomes through the deepest bench of engineering specialists in the industry
