

Citrix and Microsoft Solutions

For more than 25 years, Citrix and Microsoft have brought end-user computing solutions to the market. Both partners support tens of millions of users in a joint effort to help bring best of breed solutions to customers.

PRESIDIO CAN HELP

Presidio helps organizations achieve a holistic view across their Microsoft and Citrix workloads to achieve efficiency across technology solutions sets.

Many of our customers leverage both Microsoft and Citrix workloads in their end-user computing and server environments. From deploying NetScalers (Citrix ADC), supporting web servers with StoreFront, and designing and implementing enterprise-wide Virtual Desktop and Application infrastructures, Presidio can help.

Microsoft and Citrix solutions have a significant impact on end-user productivity. Presidio prioritizes comprehensive assessments before every implementation and ongoing education of decision-makers and end-users. Post-implementation, we perform health checks and managed services of your Microsoft and Citrix environment to ensure stable service delivery to your end-users.

As a trusted advisor, we make sure tools and applications are fully leveraged and technologies are aligned with organizational needs. We keep up with best practices in security, reliability, and adoption to make sure our customers are always benefiting from proven processes. Through workshops, training, and immersion experiences, we expose customers to new technologies and how these innovations might play out in their day-to-day work.

OUR SOLUTIONS

Citrix On-Premises

Traditional Citrix installation in customer on-premises datacenters leveraging Microsoft Windows Server for VDI have been the most versatile VDI solution for customers for many years. Presidio has performed hundreds of these installations and can deploy quickly in a stable manner.

Citrix Cloud + Citrix on Azure

Many customers are looking to deploy Citrix on Azure to replace their on-premises offering or for bursting and disaster recovery capabilities. Deploying Citrix on Azure comes with many benefits in time to deployment and financial cost in certain scenarios, especially when leveraging the Citrix Cloud management plane.

Citrix NetScaler (ADC) with Microsoft Services

Microsoft services such as Exchange, ADFS, IIS, LDAP, Radius, and many others need to be highly available and redundant in an enterprise environment. Leveraging Citrix NetScaler (ADC) as one of the leading application delivery controller platforms helps fully align Microsoft and Citrix solution deployments.

FSLogix for Office 365

Microsoft recently acquired FSLogix to better support Office 365 deployments on Citrix. Presidio has been leveraging FSLogix for years to support our Citrix and Office 365 deployments as a best practice. The use of non-persistent VDIs paired with FSLogix will allow your end-users to have a seamless Office 365 on VDI experience.
