

# VMware Horizon

vmware®

### TRANSFORM YOUR BUSINESS

Presidio helps organizations achieve a holistic view across their VMware vSphere and Horizon workloads to achieve efficiency across technology solutions sets.

Many of our customers leverage both VMware vSphere and Horizon workloads in their end-user computing and server environments. From deploying ESXi hosts and vCenter, supporting web servers with Horizon Connection Server and Administrator, and designing and implementing enterprise-wide Virtual Desktop and Application infrastructures, Presidio can help.

VMware vSphere and Horizon have a significant impact on end-user productivity. Presidio prioritizes comprehensive assessments before every implementation and ongoing education of decision-makers and end-users. Post-implementation, we perform health checks and managed services of your VMware environment to ensure stable service delivery to your end-users.

As a trusted advisor, we make sure tools and applications are fully leveraged and technologies are aligned with organizational needs. We keep up with best practices in security, reliability, and adoption to make sure our customers are always benefiting from proven processes. Through workshops, training, and immersion experiences, we expose customers to new technologies and how these innovations might play out in their day-to-day work.

### OUR SOLUTIONS

#### VMware Horizon On-Premises

Traditional VMware Horizon installation in customer on-premises datacenters leveraging Microsoft Windows Server for VDI have been the most versatile VDI solution for customers for many years. Presidio has performed hundreds of these installations and can deploy quickly in a stable manner.

#### VMware Horizon Cloud

Many customers are looking to deploy VMware Horizon on the Cloud to replace their on-premises offering or for bursting and disaster recovery capabilities. Deploying Horizon on the Cloud comes with many benefits in time to deployment and financial cost in certain scenarios, especially when leveraging the VMware Managed Cloud.

## VMware Horizon

### FSLogix for Office 365

Microsoft recently acquired FSLogix to better support Office 365 deployments on VMware Horizon. Presidio has been leveraging FSLogix for years to support our Horizon and Office 365 deployments as a best practice. The use of non-persistent VDIs paired with FSLogix will allow your end-users to have a seamless Office 365 on VDI experience.

### MASTER SERVICES COMPETENCIES

Presidio is the first VMware partner in North America to achieve all 7 Master Certifications available. MSCs are certifications offered through VMware's Partner Connect Program that demonstrate proven expertise in a specific VMware solution area.

- ◆ Cloud Management and Automation
- ◆ Data Center Virtualization
- ◆ Network Virtualization
- ◆ Digital Workspace
- ◆ Cloud Native Apps
- ◆ VMware Cloud Foundation
- ◆ VMware Cloud on AWS

### WHY PRESIDIO

Presidio is a Digital Systems Integrator providing customers the secure cloud environments that form the backbone of digital transformation. We guide you from initial assessments, strategy and consulting – to implementation and deployment – to managed services that run IT for you, topped off with a suite of flexible financing and consumption options to simplify procurement. Our services experts are thinkers AND doers focused on accelerating business outcomes for customers in all industries.

We specialize in designing, implementing and managing agile, secure digital platforms that enable customers to move their businesses at a faster pace and innovate in the way they interact with their customers, employees and partners.
