PRESIDIO®

Remote Workforce Modern Endpoint Management
Quick Start

Microsoft Gold Partner

With the changes in how employees are working remotely, having a modern endpoint management solution is key. Employers need to manage devices anytime, anywhere to ensure their employees are working effectively and securely.

PRESIDIO CAN HELP

Presidio helps organizations strategize, design, and implement modern endpoint management systems to ensure that they can manage their devices (PCs, mobile devices, etc.) no matter where they are so they remain updated and secure. Presidio has deep expertise in best of breed products like Microsoft Endpoint Manager (Intune) and can help further secure your devices, apps, data, etc.

OUR OFFERING

Microsoft Endpoint Manager (Intune)
Quick Start – $17,000

Presidio will implement a Microsoft Endpoint Manager (Intune) proof-of-concept that will provide the basis for managing all your devices and allow you to gradually move devices under management in a timeline that is comfortable for your business. This solution offering includes:

◆ Synchronizing identities and devices between your on-premises Active Directory and Azure AD

◆ Setting up Intune autoenrollment for existing Windows 10/11 devices

◆ Creating configuration and compliance policies for Windows 10/11 management

◆ Creating policies for containerized application management on iOS and Android devices

◆ Setting up automated Windows 10/11 deployment using Windows Autopilot

◆ Setting up Office 365 Apps, Adobe Reader and Google Chrome for deployment to Windows 10/11 devices

◆ Providing detailed written instructions for application deployment and Windows 10/11 automated deployments for your staff to use going forward

◆ Conducting thorough training sessions and test deployments with IT personnel on how to manage the solution

Deliverable: Microsoft Endpoint Manager POC
