

Presidio Cloud Solutions At a Glance

OUR CORE FOCUS

Presidio enables companies accelerate their journey to the cloud. Using our unique **DevOptimized™** Approach, we work with customers worldwide during every stage of solution development and cloud transformation.

We enable customers:

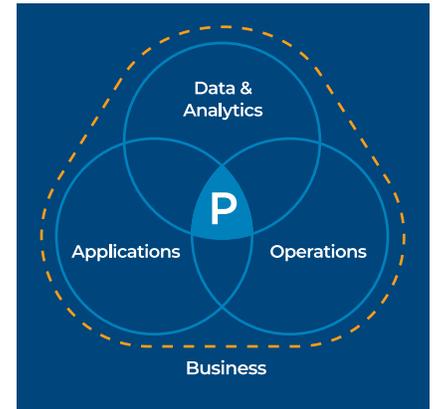

- By making DevOps a reality through Application Development and Cloud & Migration expertise and assets that accelerate the realization of benefits from technology.
- By developing value for their business quickly, speeding up the process of Application Development, IaaS, PaaS Cloud and Digital Transformation efforts.

- To garner insight and predictive capabilities through data analytics, turning a good idea into a market-leading phenomenon.

Our unparalleled ability to work at an accelerated pace allows us to deliver the right technology solutions to meet each customer's current business needs while future-proofing application projects to scale and innovate as the client's business grows. We give customers of all sizes – from startups and midmarket firms to enterprise-level Fortune 500 organizations – the **RightStart™** they need to bring their best ideas to market.

We do not focus on a vertical or an industry – everyone is on the same journey and looking for guides

Presidio Operates at the Intersection

Market Differentiators

- A global team with a broad experience in Cloud, AppDev, DevOps and Data & Analytics
- Architects and senior leaders that have deep industry experience and a dedicated focus to help your company achieve its goals
