Accelerating cloud migration with a rapid, repeatable, cost-effective approach

IT is expected to do more with less by transitioning infrastructure, applications, and data to the cloud, yet predictable but challenging events lead to a staggering number of cloud failures. Presidio Cloud Solutions leverages proven automation tools, accelerators, frameworks, and cloud transition specialists to accelerate ROI in your cloud transition. With Presidio, there's no guesswork. We've done this all before.

Through a unique partnership between Amazon and Presidio, the Migration in a Box Program provides a packaged offering combining AWS' best practices with Presidio's deep expertise in planning, designing, and executing successful cloud migrations.

## **MIGRATION IN A BOX PROGRAM**

No matter where you are at on your cloud journey, we can drive cloud adoption and migration success by leveraging our experience, knowledge, and capacity to deliver on your cloud goals. The goal is to realize the benefits of cloud - resiliency, speed, and innovation by reducing technical debt while automating and becoming more agile and productive.

### 2 weeks

## **ASSESS**

We meet with the customer to learn more about their cloud adoption and migration journey, provide an overview of the Migration in a Box Program, and validate fit for the program.

#### **Key Activities:**

- Discover migration workloads
- Assess cloud readiness (AWS Cloud Adoption Framework)
- Migration Readiness and Planning (MRP) strategy
- TCO calculations

## **Deliverables:**

- Migration Readiness
   Assessment Document
- Migration Readiness Plan
- SOW for the Mobilize phase

#### 2 - 4 Weeks

## **MOBILIZE**

Building upon the Assess phase, establish the initial Well-Architected cloud environment(s), and prepare for operational readiness.

#### **Key Activities:**

- Mobilize the team
- Create the baseline Well-Architected AWS environment
- Address cloud readiness gaps identified in the Assess phase
- Identify up to three business applications for migration

#### Deliverables:

- Well-Architected AWS environment: Control Tower, Landing Zone, Governance
- SOW for the Migrate/ Modernize phase

## 2 - 4 Weeks

# **MIGRATE / MODERNIZE**

Migrate/modernize targeted business applications and create the plan for migrating the remaining workload at scale.

## **Key Activities:**

- Migrate up to three business applications identified for migration
- Develop documentation and runbooks
- Create migration/modernization plan for the remaining application workload

#### **Deliverables:**

- Completed migration of targeted business applications
- Documentation
- Migration/Modernization plan for the remaining application workload
