Presidio Meraki SD-WAN Solutions

CISCO
Meraki

THE CHALLENGE

In today's consumer-driven application environment, two factors reign supreme: speed and security. It all rests on the back of the network that supports your applications. Many organizations face a dilemma: is our focus on performance compromising our user security, or conversely, are we sacrificing speed at the altar of outdated network security processes? Organizations now require a Software-Defined Wide Area Network (SD-WAN) that can deliver an optimal and secure user experience. However, most SD-WAN solutions are difficult to set up and manage over time.

THE SOLUTION

Cisco Meraki is a cloud-first platform that helps organizations deliver faster connections, greater user capacity, safe and secure environments, and customized experiences from a centralized console. Meraki SD-WAN is built upon powerful Meraki MX appliances to infuse best-in-class connectivity, security and intelligence into any touchpoint to ensure optimal application performance. Meraki removes the complexity of traditional SD-WAN administration with true zero-touch provisioning. As a strategic Cisco integrator with more than 600 Meraki certifications, Presidio is primed to deliver network solutions that form the backbone of digital transformation.

KEY BENEFITS

Presidio and Meraki deliver best-in-class SD-WAN to help you optimize everything for people, places, and things.

Ease of Use

SD-WAN management is unified within a single pane of glass. This streamlines operations for IT while allowing non-technical users to quickly navigate, understand, and interact with their SD-WAN deployment intuitively. With Meraki's real-time performance telemetry, autonomous network path decisions further ease the administrative burden.

Ironclad Network Protection

Meraki SD-WAN protects traffic via natively integrated advanced security, including a next-gen layer-7 firewall, Cisco threat detection, world-class cloud security and content filtering. Presidio Managed Services provides 24x7 proactive monitoring and incident management for Meraki SD-WAN customers.

Intelligent Analytics

Built-in analytics track the performance of all VPN tunnels approximately every second and expose the factors that influence how users experience business-critical resources. Meraki's root-cause analysis combined with proactive monitoring from Presidio provides a 360-degree view and single source of truth into application health, WAN health and VoIP health at all times.

Fully Managed Network

With Presidio Managed Services, customers receive the full benefit of Meraki SD-WAN and the priceless peace of mind that with from a worry-free network. Presidio provides a 24x7x365 network operations center (NOC), proactive monitoring and rapid incident response. Customers also gain access to Presidio's unparalleled team of networking experts for engineering and advanced technical support. We also offer vendor management, handling cases directly with Cisco as needed.

Presidio Meraki SD-WAN Solutions

WHAT MAKES US DIFFERENT

Presidio is a leading digital systems integrator, with deep experience in networking, cloud computing and broad hybrid infrastructures. Presidio combines our project management methodology with our technology experience to deliver large scale digital transformation engagements. We approach SD-WAN with a focus on our customers' business outcomes. Our professional services engagement model is built on the following value factors:

- Deep understanding of our customer's business drivers and digital transformation goals
- Business outcome definition
- Use case creation
- Business value creation with return on investment and total cost of ownership calculation

WHY PRESIDIO

Presidio is recognized by industry leaders for our ability to solve client challenges as they move to the cloud. We attract best-in-class engineering resources with the experience and knowledge to get it done right the first time.

Our clients benefit from:

- Thought leadership across technologies
- Experience in architecting, implementing, securing, and managing any digital transformation needs
- Multi-discipline experts provide for a broad view of client's potential vulnerabilities
- Deep engineering bench and broad technology services solutions provide domain expertise and consistent deliverables

Close integration between design, delivery, and customer experience teams results in professionally implemented solutions for your unique needs.

PRESIDIO & CISCO

Presidio partners closely with Cisco to power successful business outcomes for our joint clients. We understand that cloud is only as powerful as the network that supports it, unified collaboration hinges on highly available applications, and security is paramount for any cloud or hybrid strategy. Hence, the powerful alignment between Presidio's full lifecycle services and Cisco's best-in-class technology is the differentiator behind customers' ever-evolving digital transformation.
