

IGEL Secure Endpoint OS for Now & Next

Transform Your Digital Workspace with Presidio and IGEL

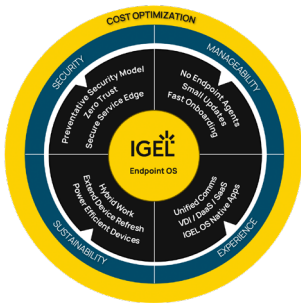

Presidio's Digital Workspace team understands the challenges and security risk of traditional endpoint management. The team designs digital workspaces with innovative technologies to bolster security and reduce the strain on limited IT resources, accelerating business outcomes for our customers.

Achieve comprehensive preventative endpoint protection for a more secure and resilient enterprise. IGEL is the secure endpoint OS for SaaS, DaaS, VDI and secure browser environments. Presidio, with IGEL, modernizes the digital workspace, to cut through complexity and increase efficiency. IGEL OS is seamless to manage saves money, fuels growth, and drives organizations forward.

The IGEL Preventative Security Model™ supports Zero Trust

IGEL OS is designed around a Preventative Security Model™ that removes the attack vectors exploited by bad actors for ransomware and other cyber-attacks by reducing the endpoint attack surface by up to 95%. IGEL integrates with leading authentication vendors to support the Zero Trust approach to IT security. The endpoint contains no data, this supports key privacy compliance initiatives like HIPAA for healthcare and other industry specific compliance mandates.

Simplify Endpoint Management

Together Presidio and IGEL provide a modern endpoint strategy with fast onboarding, small updates and no add-on endpoint management agents. A solution built to support the many ways our customers work.

Preventative Security

The IGEL Preventative Security Model™ provides unparalleled endpoint security, reducing risk and providing the assurance Presidio needs to deliver an innovative and resilient digital workspace.

Reduce Endpoint TCO

With Presidio and IGEL, enterprises optimize their existing endpoint devices with IGEL, extending the refresh cycle. IGEL removes add-on management and security agents for a cost-effective, endpoint strategy for the enterprise.

Achieve Your Sustainability Goals

IGEL OS supports your IT sustainability goals by reducing power consumption and extending device lifecycles to help reduce your e-waste and carbon footprint by up to 60%. E-waste and energy consumption reduction both contribute to your company meeting its Environment, social and compliance governance (ESG) goals.

Digital Experience

IGEL's native apps, integration with leading collaboration, workspace and developer tools enable apps, including Zoom and Teams, to utilize local hardware for optimal performance. IGEL OS works seamlessly with leading partners and is fully integrated in select Lenovo devices and pre-installed on HP and LG devices. Presidio can leverage the power of IGEL to elevate the customer experience.

Presidio and IGEL can help you achieve your desired business outcomes with secure and optimized access to your digital workspaces while reducing the strain on your IT department to manage the endpoints.
