

# Microsoft Fabric Workshop

## BENEFITS OF THE WORKSHOP

Participants and the organization will gain immediate value and insight, including:

- ◆ **Unified Analytics Platform:** Fabric's all-in-one analytics capabilities, combining data integration, storage, and analytics
- ◆ **AI and Automation Integration:** Fabric's embedded AI and automation tools, such as Copilot and Data Activator
- ◆ **Comprehensive Data Lake:** OneLake, a multi-cloud data lake that consolidates organizational data
- ◆ **Flexible, Cost-Effective Architecture:** Fabric's SaaS foundation, offering a pay-as-you-go model, simplifying infrastructure management
- ◆ **Customized Strategy and Roadmap:** Receive a tailored action plan with recommendations to maximize Databricks' value aligned with business goals

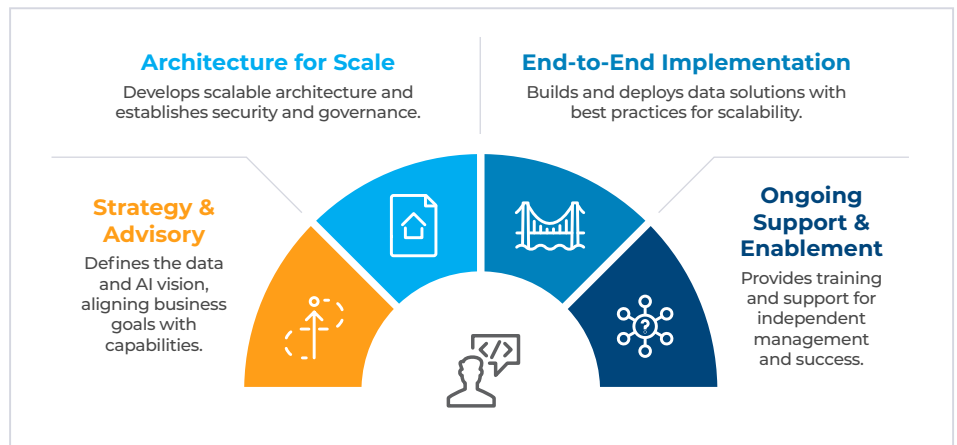

- ◆ **Foundational Knowledge:** Best practices for data engineering and analytics
- ◆ **Security & Governance:** Identify core components for data security, governance, and compliance, with a focus on Purview
- ◆ **Gap Analysis & Priority Areas:** Discover key gaps in the current data landscape and define priorities
- ◆ **High-Level Roadmap:** Outline major phases and essential steps for a successful data estate project

## KEY WORKSHOP OUTPUTS

Value and insight through the following key outputs:

- ◆ **Strategic Data & AI Vision:** Clarity on long-term data and AI goals

**Core Competencies:** Presidio's Data & AI competencies – driving the discussion and findings during the workshop.

**Microsoft Fabric:** The OneLake based unified compute, analytics, warehousing and BI platform + Purview.
