PRESIDIO®

Cloud Services

Accelerate Your Application Delivery with Presidio and Red Hat OpenShift

THE CHALLENGES

CUSTOMER EXPECTATIONS AND CYBER THREATS

Rapid application development and deployment are critical for staying competitive in today's complex hybrid cloud environments. Organizations need agility to meet demanding customer expectations, combat cyber threats, and drive innovation.

THE SOLUTION

Red Hat OpenShift, Powered by Presidio

Presidio, in partnership with Red Hat, offers a comprehensive platform for modern application development and delivery: Red Hat OpenShift. This enterprise-ready Kubernetes-based platform simplifies hybrid cloud operations, enabling organizations to focus on building and deploying applications faster and more efficiently.

WHAT IS OPENSHIFT?

OpenShift is a robust, opinionated Kubernetes distribution that streamlines container and virtual machine workloads across diverse infrastructure providers. It addresses the complexity of microservices and container orchestration by providing a unified platform with integrated tooling, hardened security, and enterprise-grade support.

Red Hat OpenShift

KEY ADVANTAGES OF OPENSHIFT

- ◆ **Accelerated development:** OpenShift significantly reduces application development time, allowing faster time-to-market.
- ◆ **Simplified operations:** It simplifies the deployment and management of applications across hybrid cloud environments.
- ◆ **Enhanced flexibility:** OpenShift supports on-premises and cloud deployments, providing flexibility to adapt to changing business needs.
- ◆ **Increased efficiency:** Built-in workflows for CI/CD, container builds, and deployments optimize operational efficiency.
- ◆ **Robust security:** OpenShift provides advanced security features to protect applications and infrastructure.
- ◆ **Comprehensive support:** Red Hat offers enterprise-level support for OpenShift and its integrated tools.
- ◆ **Market leadership:** OpenShift is a recognized leader in container management and DevOps platforms.

PRESIDIO'S EXPERTISE

Presidio leverages its deep expertise in cloud-native technologies to help organizations implement and optimize OpenShift. We provide comprehensive services, including:

- ◆ **Strategic consulting and assessment.**
- ◆ **Implementation and deployment.**
- ◆ **Managed services.**

Accelerate Your Application Delivery with Presidio and Red Hat OpenShift

KEY BENEFITS FOR YOUR BUSINESS

◆ **Faster innovation:** Speed up application development by 65% in the second year of use and increase operational efficiency by up to 50%.[1]

◆ **Improved security:** Enhance your organization's security posture with OpenShift's robust security features.

◆ **Increased productivity:** Streamline development workflows and empower teams to focus on core business initiatives.

◆ **Simplified management:** Gain centralized visibility and control over your applications and infrastructure.

◆ **Reduced operational costs:** Optimize resource utilization and reduce infrastructure maintenance overhead.
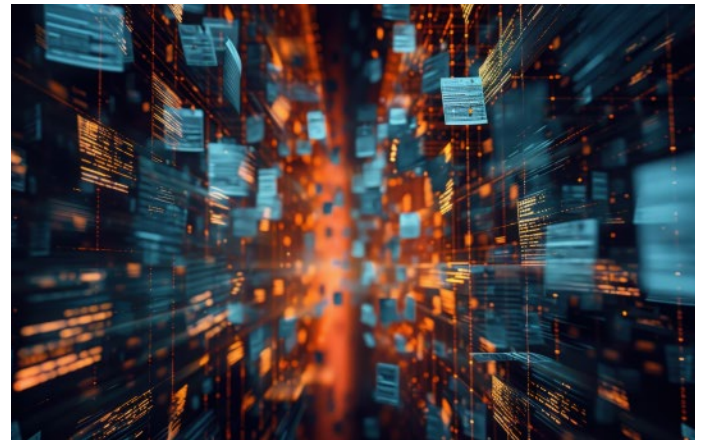

USE CASES

◆ **Rapid application development and deployment.**

◆ **Securing hybrid cloud environments.**

◆ **Enabling self-service development.**

◆ **Running on-demand development environments.**

◆ **Enabling CI/CD pipelines.**

◆ **Migration of virtual machines.**

WHY CHOOSE PRESIDIO?

Presidio is a global digital services and solutions provider that empowers businesses through secure cloud environments. We offer end-to-end services, from strategy and implementation to managed services and flexible financing options. Our partnership with Red Hat ensures that you receive best-in-class solutions and support.

NEXT STEPS

Partner with Presidio to unlock the full potential of Red Hat OpenShift and accelerate your digital transformation. We'll guide you through every step, ensuring a seamless and successful implementation.
