PRESIDIO®

"Effective Enterprise-Enabling AI" Workshop

Establishing coordinated, use-case-driven agentic AI for the enterprise can be a challenging endeavor for even the most technology-savvy organizations.

Presidio helps its clients analyze, prioritize, and scope their adoption of agentic AI amid the cluttered landscape of solutions, from off-the-shelf offerings to custom deployments. We work with you to establish a common understanding of AI terminology and define your maturity model, approach, and methodology to maximize your Agentic AI investment.

Who Should Participate

As Presidio facilitates these workshops in a single day, application or business owners and subject matter experts are crucial representatives who need to participate directly.

Suggested Attendees:

- CISO, CTO, CLO, +/or COO
- VP/ Director of IT
- VP/ Director of Data

Workshop Topics

The following topics may be covered during the workshop:

- **Agentic AI terminology:** Common nomenclature, distinguishing characteristics and application, and areas of impact for the enterprise
- **Approach and methodology:** for identifying AI use-cases, differentiating between custom and OTS solutions, and how to prioritize use cases with the highest "value-score" for the organization.
- **AI maturity model:** Determining AI readiness by mapping client's current state maturity in operations, security, and performance
- **Operating model and data governance:** Insights into developing an operating structure and governance to help direct, control, and accelerate AI implementations, efficacy and value.

Key Workshop Outputs

Gain immediate value and insight through the following key outputs of the workshop:

- Business alignment of high-level goals and objectives for agentic AI and initial approach to use case prioritization
- A punchlist of roadmap activities, including next steps, timelines, and resource needs, to pilot your prioritized agentic AI initiative
- High-level, resilient governance design alongside recommendations for its implementation and for a data maturity assessment specific to the client's environment and integrated AI target state

Benefits of Workshop

The workshop provides your leadership team with the following benefits:

- Aligned understanding on what agentic AI is and what it enables
- Detailed, client-specific strategic advantage for agentic AI deployment
- Identified and prioritized pilot use cases
- Identified data sources and data demands
- Clarified risk appetite and speed requirements
- High-level approach to coordinated AI governance across enterprise
