Stop SaaS Breaches Today

Get Started with a Complimentary SaaS Security Risk Review

SaaS Security Risk Review

- App-to-App Governance
- User Behavior Analytics
- **Workspace Security** — Microsoft 365
- Device-to-SaaS Security
- SaaS Configuration Security
- **Sales Data & CRM Security** — salesforce
- Compliance
- Identity Governance

Did you know?

- There was a 50% year-over-year increase in access broker activity in 2024[1]
- 38% of organizations have experienced at least one software as a service (SaaS) app breach[2]
- SharePoint and Outlook were accessed in 22% and 17% of relevant intrusions, respectively.

Adversaries are exploiting the expanding attack surface created by business-critical SaaS apps. Visibility into your SaaS application security posture is the first step to staying ahead.

What you'll get

CrowdStrike experts will provide:

Instant visibility into the risks in your Microsoft 365 and Salesforce environments

Insights into security gaps, including misconfigurations, weak multifactor authentication (MFA) and single sign-on (SSO), and overprivileged accounts

Expert guidance on protecting against SaaS-based threats, such as hybrid lateral movement and brute-force attacks

Get started now

1. Request your complimentary SaaS Security Risk Review
2. Engage in a 1:1 session with a SaaS security expert
3. Identify immediate opportunities to strengthen your SaaS security posture
