

Supply Chain Workshop

Today's supply chains are rapidly evolving to become increasingly digital and integrated. According to PwC's 2025 survey, 53% supply chain leaders are using AI to anticipate and mitigate disruptions, while another 31% are piloting it.

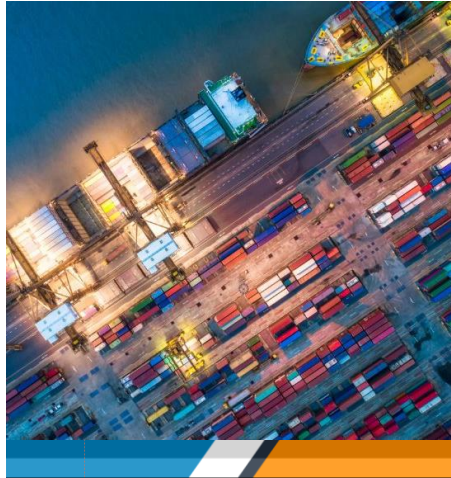

Presidio will collaborate with you to review the current state of the supply chain, identify pain points, prioritize transformation opportunities, develop a future state vision and a roadmap as appropriate. We do this with a strong focus on business outcomes such as driving growth, reducing cost, improving efficiency and customer experience

Who Should Participate

As Presidio facilitates these workshops in a single day, supply chain leaders, Line-of-business leaders, application owners and subject matter experts are crucial representatives who need to participate directly.

Recommended Attendees:

- Supply / Demand Planners
- Logistics / Transportation SME
- Digital Transformation Architects / Application Leads
- Supply Chain Control Tower Lead

Workshop Topics

The following topics may be covered during the workshop:

- Improving Supply Chain Visibility using Control Towers, IoT and Sensor integration to drive real-time decision making
- How to drive better OTIF rates and customer experience with Demand forecasting using historical data and external data?
- Adjusting Inventory levels in real-time leveraging Agentic AI leading to higher operational efficiency and creating more focus on strategic initiatives
- AI-driven Suppliers' Risk- Monitor geopolitical, financial, and environmental risks to improve supplier risk management
- Carbon Emission optimization through smarter logistics to meet sustainability goals
- What in-house capabilities exist (and gaps) to drive the new initiatives?

Key Workshop Outputs

Gain immediate value and insight through the following key outputs of the workshop:

- Education on supply chain trends and disruptions
- Identify bottlenecks, inefficiencies, and risks across supply chain (Plan, Source, Make, Deliver, Return).
- Prioritized top 3–5 pain points
- Determine quick wins vs. long-term initiatives
- Define next steps: pilots, assessments, and/or proof-of-concepts

Benefits of Workshop

Presidio's Supply Chain Workshop will provide the following benefits:

- Get an outside-in perspective on supply chain topics such as Real-time decision making using agentic workflows, Dynamic Forecasting and Autonomous Inventory Adjustments
- Identify transformation initiatives aligned to business outcomes and higher ROI
- A preliminary roadmap for your supply chain transformation opportunities, aligning them with business goals and ensuring a phased, manageable approach.
