

Why Wiz and Presidio

Wiz and Presidio collaborate to provide organizations with enhanced cloud security and governance solutions. Wiz's platform offers advanced tools for cloud-native application protection, threat detection, and risk prioritization. Presidio specializes in IT consulting, deployment and managed services. Together we enable our clients to secure their cloud environments more effectively by integrating Wiz's cutting-edge security features with Presidio's expertise in cloud migration, governance, and operational strategies.

This partnership focuses on helping clients streamline multi-cloud security, improve compliance, and adopt best practices for modern cloud operations.

ABOUT WIZ

Wiz transforms cloud security for customers – including 45% of the Fortune 100 – by enabling a new operating model. With Wiz, organizations can democratize security across the development lifecycle, empowering them to build fast and securely. It's Cloud Native Application Protection Platform (CNAPP) drives visibility, risk prioritization, and business agility, and is #1 based on customer reviews.

HOW CLIENTS BENEFIT FROM THE PRESIDIO AND WIZ PARTNERSHIP

- ◆ Enhanced cloud security
- ◆ Streamlined multi-cloud management
- ◆ Proactive risk mitigation
- ◆ Tailored consulting services
- ◆ Improved compliance and governance

WIZ FOR CSPM

Unlike legacy CSPM tools, Wiz CSPM takes a modern approach to security in the cloud by looking across all risk factors to identify toxic combinations that put your environment at critical risk. Wiz does deep risk analysis not only of misconfigurations, but across network exposures, secrets, vulnerabilities, data, identities and AI risks. By using a unified risk engine across all risk factors, with the same back-end data model, Wiz is able to correlate all risk factors to understand toxic combinations in an environment.
