

# LEGACY NETWORKS ARE HOLDING YOU BACK

Most enterprise networks were not designed for today's AI-driven, unified, and always-on business reality. Manual operations, fragmented tools, and aging infrastructure now limit speed, scale, and security.

The Time to Modernize is Now

 **1 Hour of Downtime**  **\$400K<sup>1</sup> in losses**

**Each day without network modernization costs opportunity – and increases risk.**

**Security Vulnerabilities**  
Legacy networks can't provide the granular security controls needed for today's threat landscape.

**Competitive Disadvantage**  
While you're maintaining yesterday's network, your competitors are building tomorrow's advantage.

**Operational Inefficiency**  
Manual processes that worked in legacy environments for 50 don't scale to 5,000.

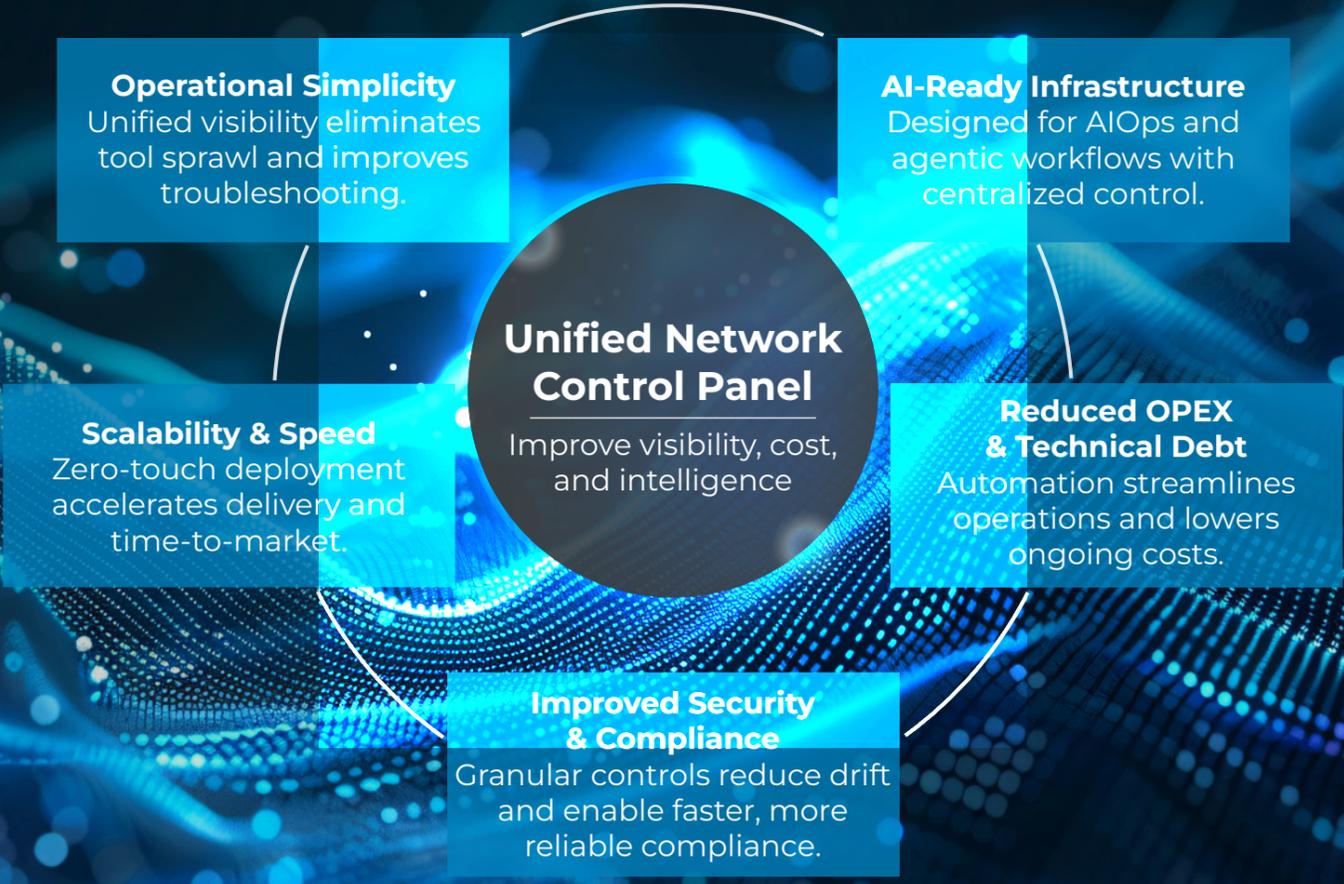

**Technical Debt**  
The longer you wait, the more expensive and complex modernization becomes.

<sup>1</sup> Cisco: Assure digital experiences across every network, 2025

## Modernize Your Network with Presidio

### Evolve from Legacy

## AI-Enabled Network Modernization

By applying intelligence and automation to network modernization, **AI Studio empowers Presidio teams to deliver faster, smarter client outcomes** with advanced design analysis, simulation modeling, and digital twin insights.

## Take the First Step in Your Network Modernization Journey

**Build the network your business deserves.** Partner with us to design, optimize, and evolve a network ready for what's next.
