

Modern Platforms

VMware App Infrastructure Modernization Assessment

THE CHALLENGE

To be competitive, modern enterprises must respond to ever changing business requirements quickly. Organizations are looking to automation and standardization because deployments are inconsistent, manual processes lead to human errors, and the proliferation of technologies and system configurations become complex to manage at scale.

THE APPROACH

Presidio's DevOps services allow clients to operationalize VMware DevOps tooling and automation at scale throughout the enterprise. Presidio's DevOps approach educates our customers about VMware DevOps platforms, while also teaching platform engineering culture to break down organizational silos, increase developer velocity, and operational efficiency.

VMware and VMware platforms such as VMware Cloud Foundation and VMware Kubernetes Service enable customers to manage on-premises and cloud environments, host applications securely, and scale their operations in a mature, enterprise-ready manner.

THE SERVICE

- ◆ DevOps workshops that drive enablement and detailed requirements gathering with various stakeholders of the organization.
- ◆ Define metrics and KPIs from stakeholders that align with key attributes tied to business outcomes, application requirements, developer productivity, operations, security, and governance.

- ◆ Map modernization activities, metrics, KPIs, and roadmap activities to success criteria, collaboratively with customer resources.
- ◆ Evaluate and document existing Kubernetes infrastructure, toolchains, and processes
- ◆ Map application dependencies and provide app-level modernization recommendations for vSphere Kubernetes Service hosting
- ◆ Define a modernization strategy for applications, their infrastructure, and their management, utilizing VMware technologies and the existing customer ecosystem.
- ◆ Produce deliverables allowing clients to understand their current organizational culture, capabilities, business priorities, key challenges, and stakeholders in how it relates to adopting container technology.
- ◆ A final knowledge transfer session going over Key Findings and Recommendations.

WHY PRESIDIO?

Presidio is here to guide your digital journey and help you navigate the fast-changing tech landscape. As the bridge between where you've been (foundational IT) and where you're going (ultra-modern AI and cloud services), we measure success in your terms. We strive to build lifetime relationships with those that give us their business, and we do so by being fearless, fast, flexible, and compassionate. It's our mission to earn your trust and deliver innovative, high-quality results at the speed your business needs to succeed
