

VMware Private Cloud Optimization Workshop

Presidio's VMware Private Cloud Optimization Workshop provides an AI-accelerated assessment of your current VMware environment, identifying risks, inefficiencies, and modernization opportunities while delivering a clear, prioritized roadmap for infrastructure and application transformation. Organizations gain actionable insights to improve performance, reduce costs, and prepare for a successful adoption of the VMware Cloud Foundation (VCF) private cloud solution.

Who Should Participate

- IT Infrastructure & Operations Leaders (VP, Director level)
- Virtualization / VMware Administrators & Architects
- Data Center & Cloud Platform Owners
- IT Strategy & Transformation Leaders
- Security & Compliance Stakeholders
- Application & DevOps Leaders (for modernization alignment)

Workshop Topics

- Current-state VMware environment analysis (hosts, clusters, workloads)
- Hardware lifecycle and supportability risk assessment
- VMware version, upgrade readiness, and VCF compatibility
- Capacity and utilization analysis (VM density, CPU, storage)
- Legacy operating system and security exposure review
- Cloud-native and containerization readiness evaluation
- Identification of optimization and modernization opportunities
- Development of a phased remediation and transformation roadmap

Key Workshop Outputs

- Comprehensive current-state environment assessment
- Identified risks (hardware EOL, unsupported OS, performance gaps)
- Upgrade and modernization readiness analysis (including VCF alignment)
- Quantified optimization opportunities (cost savings, resource reclamation)
- Prioritized remediation roadmap with phased timeline
- Strategic recommendations for platform and application modernization

Benefits of Workshop

- Clear visibility into infrastructure health and risk exposure
- Reduced operational costs through consolidation and optimization
- Improved performance and resource utilization
- Accelerated readiness for VMware Cloud Foundation (VCF) and application modernization initiatives
- Enhanced security and compliance posture
- Actionable, phased plan aligned to business priorities and budget cycles
