Cortex XSIAM Services

THE CHALLENGE

CISOs and security leaders face increasing pressure to manage rising incident costs, a shortage of skilled analysts, and tool sprawl that adds complexity without improving outcomes. Traditional SIEM and SOAR platforms can't keep up with today's scale, leaving teams overwhelmed, inefficient, and reactive.

THE SOLUTION

Presidio's Cortex XSIAM professional services empower enterprises to modernize their SOCs with a converged platform that unifies SIEM, SOAR, XDR, ASM, and threat intelligence. By moving beyond traditional deployments, we enable automation-first operations that reduce risk exposure, improve operational efficiency, and deliver clear financial impact. Our lifecycle approach ensures that organizations don't just "install" SIAM, they achieve full adoption and continuous improvement, positioning their SOC for resilience in the face of evolving threats.

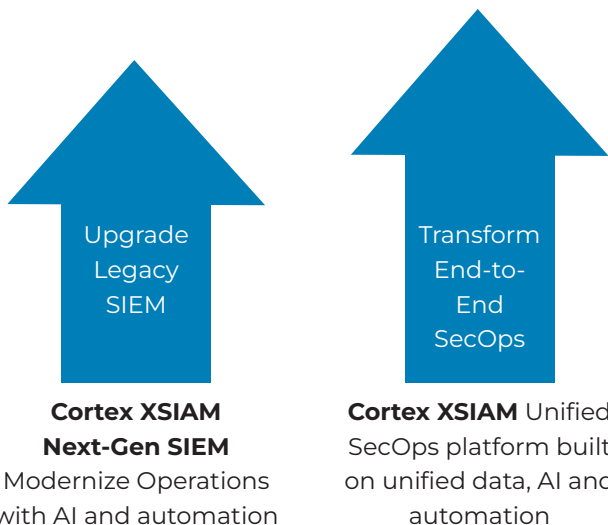

THE APPROACH

Presidio delivers end-to-end Cortex SIAM services designed for measurable outcomes, not just tool deployment. Our proven methodology includes advisory, seamless integration, automation enablement, and continuous operational optimization. We help clients fully operationalize SIAM, aligning technology, people, and processes to achieve security operations transformation.

KEY BENEFITS

- ◆ **Lifecycle Ownership:** From SOC maturity assessment to continuous optimization.
- ◆ **Automation-First Expertise:** Operationalizing AI-driven detection and response at scale.
