

Digital

# GovMod Accelerator

*Build, launch, and scale secure, mobile-first government services faster.*

## THE CHALLENGE

State and local governments are under pressure to modernize digital services while managing aging infrastructure, fragmented systems, and strict compliance requirements. Disconnected agency systems create inconsistent experiences, duplicate logins, and inefficient service delivery, while custom-built solutions remain slow and costly—often taking 18–36 months to deploy. At the same time, compliance frameworks such as CJIS add complexity and increase implementation risk. Without a unified way to connect systems and orchestrate services, governments struggle to deliver the fast, seamless, mobile-first experiences constituents expect.

## THE IMPACT

Due to the challenges described above, government agencies face systemic barriers to modernization:

- ◆ **Fragmented Constituent Experiences**  
Disjointed systems create inconsistent interactions, duplicate logins, and broken service journeys.
- ◆ **Slow and Costly Delivery**  
Custom development cycles delay outcomes and increase project risk.
- ◆ **Limited Ability to Scale**  
Each new service requires significant rework, slowing innovation across agencies.
- ◆ **Increased Compliance Burden**  
Security and regulatory requirements add complexity and extend delivery timelines.
- ◆ **Erosion of Public Trust**  
Inconsistent and inefficient digital services reduce confidence in government operations.

Government leaders are caught in a difficult position: they are mandated to modernize and improve services, but constrained by legacy systems, budgets, and risk.

## THE SOLUTION

GovMod Accelerator helps state and local governments rapidly deliver secure, mobile-first digital services without replacing existing systems. Using reusable service modules, integrated identity controls, and a centralized orchestration layer, agencies can unify services and accelerate modernization compared to traditional custom development.

By connecting existing systems and standardizing workflows, governments can deliver consistent, mobile-first experiences across the constituent journey while accelerating modernization efforts.

## KEY BENEFITS

Our GovMod Accelerator delivers measurable value across government organizations, including:

- ◆ **Accelerated Time-to-Production**  
Launch digital services up to 50–70% faster than traditional custom-built approaches.
- ◆ **No Rip-and-Replace Required**  
Modernize services by connecting and overlaying existing systems—preserving current investments.
- ◆ **Unified Constituent Experience**  
Deliver a single, mobile-first, secure experience across agencies, services, and touchpoints.
- ◆ **Reusable, Scalable Architecture**  
Leverage 80% reusable components to rapidly expand from initial use cases to full platform adoption.
- ◆ **Built-In Security and Compliance**  
Support CJIS-aligned security and operational requirements through integrated identity, access, and governance controls.
- ◆ **Automated Document Validation**  
The platform reads and validates uploaded documents, reducing manual entry.
- ◆ **Launch New Services Without Engineering**  
Admins configure and publish services via the Admin Portal, connected to existing agency systems through pre-built connectors.

# GovMod Accelerator

## EXAMPLE USE CASES

Scenario	Before	After GovMod Accelerator
Move to a New Address	8-12 separate updates	One workflow that syncs licenses, benefits, taxes, and schools
Start a Business	Multi-agency paperwork and delays	Guided “Start a Business” journey with pre-filled data and real-time tracking
Apply for Benefits	Separate forms, long waits	AI-powered eligibility matching and unified applications
Natural Disaster Aid	Disconnected aid programs	Unified emergency portal with real-time alerts and resources
Adaptive Constituent Services	Static, reactive service delivery	AI-powered proactive recommendations

### HOW IT WORKS

The GovMod Accelerator connects fragmented agency systems through a centralized integration and orchestration layer that overlays existing infrastructure without requiring migration or replacement. Unified identity and access management capabilities provide secure, compliant constituent access across services and agencies, while pre-built service modules accelerate deployment for renewals, payments, permits, and benefits. AI-enabled workflow orchestration coordinates notifications, routing, and cross-agency interactions to deliver seamless, mobile-first constituent experiences with greater operational efficiency, scalability, and control.

### WHAT MAKES US DIFFERENT

- Purpose-Built for Government Modernization**  
 Designed specifically for state and local government—not adapted from commercial solutions.
- One Platform, Unlimited Use Cases**  
 Supports a wide range of services—from payments and renewals to benefits and permits—without rebuilding.
- Reusable Service Delivery Framework**  
 Deploy new services using reusable workflows, integrations, and service modules instead of rebuilding capabilities for every initiative.
- Centralized Orchestration vs. Custom Development**  
 Replaces fragmented, one-off builds with a reusable orchestration layer for faster, more consistent delivery.

### WHY PRESIDIO

Presidio is here to guide your business transformation journey by helping you carefully navigate the fast-changing tech landscape. As the bridge between where you’ve been with foundational IT, and where you’re going with modern AI and cloud services, we measure success with you on the terms you define. We strive to build lifetime relationships with each of our customers, and we do so by being fearless, fast, flexible, and compassionate. It’s our mission to earn your trust and deliver innovative, high-quality outcomes at speeds once thought not possible, so you can achieve your business goals faster.

#### Deliver secure, scalable digital government experiences without the delays of custom builds

Presidio helps state and local governments modernize constituent services by connecting fragmented systems into a unified digital experience. By combining integration, orchestration, and reusable service modules, we help agencies deliver secure, mobile-first services without costly rip-and-replace efforts. With GovMod Accelerator, governments can accelerate service delivery, improve efficiency, and scale consistent constituent experiences across agencies.
