

Scaling Higher Ed for Today's Growing Demands

THE CHALLENGE

Campuses today are expected to operate as fully digital, always-on environments. Students expect seamless access from anywhere. Faculty members depend on high-performance platforms. Researchers operate under strict security and compliance mandates.

But most institutions are still navigating:

- Limited visibility across hybrid environments
- Operational strain on already stretched IT teams
- Growing cybersecurity exposure
- Rising pressure to do more with less

The ambition to build the campus of the future is there. But the environment itself has become too complex to manage intuitively.

THE SOLUTION

Presidio helps universities bring clarity, control, and confidence back into their environments. By making infrastructure observable, operations intelligent, and access seamless, Presidio delivers campus modernization that is measurable, not risky.

Build a Living Model of Your Campus *Digital Twin for Infrastructure*

Understanding your environment in real time changes how decisions get made.

Presidio creates a dynamic model of your network, cloud, data center, and security layers to give you the ability to test changes, validate configurations, and optimize performance before anything touches production.

The result is fewer surprises, stronger resilience, and a more predictable path forward.

Unlock Capacity Without Adding Headcount *Automation & Workforce Efficiency*

Campus IT teams are carrying the weight of manual processes that no longer scale.

Presidio delivers no-cost automation discovery workshops to identify the high-impact workflows to automate across IT operations, student services, and administrative functions to deliver measurable gains in 6-8 weeks.

This frees teams to focus on higher-value work while improving speed and consistency across the institution.

Scaling Higher Ed for Today's Growing Demands

Make Access Seamless and Trusted Student & Faculty Experience Assurance

Digital access is now the front door to the university.

Presidio helps ensure that applications are always available, performance is consistent, and security is embedded into every interaction regardless of location or device.

With validated architectures and real-time insights, institutions can support a truly borderless campus experience without compromising control.

WHAT CHANGES WHEN THE ENVIRONMENT WORKS?

- ◆ Decisions are based on visibility, not assumptions
- ◆ Changes are validated before they introduce risk
- ◆ Staff time shifts from maintenance to innovation
- ◆ Students and faculty experience technology that simply works

WHY PRESIDIO

Presidio brings together infrastructure, automation, and experience into a single, cohesive approach grounded in engineering depth and delivered with speed. And with 500+ contract vehicles, volume purchase agreements, and a dedicated software lifecycle team, we help institutions move forward with confidence, simply.

Start with What You Need to See First

- ◆ **Digital Twin Workshop** → Understand your environment in real time
- ◆ **Automation Discovery** → Identify fast, measurable efficiency gains
- ◆ **Experience Validation** → Ensure secure, reliable access everywhere
