

Amazon End User Computing Workshop – WorkSpaces & AppStream

Presidio's Amazon EUC workshop helps organizations better understand their readiness to migrate their VDI desktops and applications to the cloud, determine next steps, and jumpstart the migration and modernization process.

Our AWS experts can review the current state of the AWS environment and existing VDI infrastructure. Activities consist of discovery and review sessions to deliver a roadmap for successful Amazon WorkSpaces and Amazon AppStream 2.0 deployments.

Who Should Participate

Presidio's Digital Workspace EUC team facilitates the hands-on workshop over three sessions, so your participation is vital.

SMEs and application business owners are crucial representatives and are expected to participate directly. These include:

- Application Owners and IT Stakeholders
- Solution Architects and Desktop Engineers
- IT Leaders & Cloud Architects

Workshop Topics

The following topics may be covered during the workshop sessions:

- Review of existing AWS environment or existing on-premise platform.
- Overview of AWS EUC services – WorkSpaces and AppStream as well as their backend components.
- Define and prioritize which use cases and applications should move to the cloud.
- Create Total Cost Ownership (TCO) model using AWS Pricing Calculator.
- Demo end-user experience.
- Determine your overall readiness and next steps.

Key Workshop Outputs

Gain immediate value and insight through the following key outputs of the workshop:

- Architectural priorities with infrastructure and desktop design considerations.
- Amazon EUC migration approach for your desktop and applications.
- TCO model for Amazon EUC.
- As needed, approach to developing wave plans for migration and modernization based on business value, risk, and priority.
- Phase-level roadmap including key milestones.

Benefits of Workshop

The workshop provides your leadership team with the following benefits:

- Organize a high-level plan and approach for your migration to Amazon EUC services.
- Understand any business, security, or regulatory constraints to consider for your migration.
- Evaluate the current state of AWS infrastructure and develop a robust approach to starting your Amazon EUC deployment.
- Develop an understanding of discovery and mapping use cases that best fit your environment and needs.
- Build momentum for your VDI migration by aligning your current state with an actionable plan, and recommended next steps.
