

AWS Migration Readiness Workshop

Presidio's Cloud Migration Readiness Workshop helps organizations better understand their readiness to migrate their workloads and applications to the cloud, determine next steps, and jumpstart the migration and modernization process.

Workshop Topics

The following topics may be covered during the workshop sessions:

- Building the foundation for a successful migration
- Define and prioritize which workloads and applications should move to the cloud, which should not (7 Rs)
- How to develop a pragmatic strategy to migrating to the cloud with common sense approach and realistic timelines and costs
- How to Accelerate results without introducing risk or additional complexities
- How to build automation, security and general governance / monitoring into your cloud strategy
- Mitigating common risks and challenges associated with a migration
- Overall organizational readiness and migration preparation activities

Our AWS experts can alleviate your cloud adoption challenges and guide your transformation journey by providing guidance and a roadmap to moving your workloads with the right approach.

Who Should Participate

Presidio's Cloud Migration team facilitates the hands-on workshop over three sessions, so your participation is vital.

SMEs and application business owners are crucial representatives and are expected to participate directly. These include:

- Application Owners and IT Stakeholders.
- Solution Architects and Developers.
- IT Leaders & Cloud Architects

Key Workshop Outputs

Gain immediate value and insight through the following key outputs of the workshop:

- Architectural and modernization priorities with Environment and Landing zone considerations.
- Cloud Migration Approach (re-platform, refactor (rearchitect), or replace) across your application archetypes
- Approach to developing wave plans for migration and modernization based on business value, risk, and priority
- Phase-level Roadmap including key milestones

Benefits of Workshop

The workshop provides your leadership team with the following benefits:

- Organize a high-level plan and approach for your Cloud Migration
- Understand any business, security, or regulatory constraints to consider for your migration
- Evaluate your current state and develop a robust approach to starting your cloud migration journey
- Develop an understanding of discovery and mapping solutions that best fit your environment and needs
- Build momentum for your migration by aligning your current state with an actionable plan, and recommended next steps
