

MIGRATE YOUR VMWARE WORKLOADS WITH THE FASTEST PATH TO AZURE

Start your journey with Azure VMware Solution + Azure NetApp Files
implemented by Presidio

Enterprises can face significant challenges when reevaluating how to best run their VMware workloads in the cloud. To be set up for success in the cloud, Microsoft and Presidio have the answer to help you confidently take the first step.

Migrate VMware workloads to Azure VMware Solution

Azure VMware Solution (AVS) is a private cloud in Azure that enables you to migrate VMware workloads “as is” with little or no refactoring to continue using familiar VMware tools. By attaching Azure NetApp Files (ANF) to AVS, you gain a cost-effective, fully managed file storage service that can handle the most demanding workloads. Together, AVS and ANF help you move VMware workloads to a private cloud environment quickly without disrupting your operations.

Why Azure VMware Solution + Azure NetApp Files?

Simplified migration

Ease your migration efforts with little to no refactoring or application modifications.

Cost-effectiveness

Optimize your VMware workloads in AVS and scale storage independently of compute with ANF.

Security and availability

Leverage built-in, multi-layer Azure protection and cost-effective disaster recovery.

Agility

Rapidly deploy new hosts and external storage to scale your capacity and performance.

Performance

ANF has three performance tiers that can be provisioned for AVS, allowing unmatched flexibility.

Presidio + Microsoft: Empowering global innovation

Our partnership with Microsoft is centered on delivering unparalleled value to customers of all sizes. With Presidio, you can leverage our extensive experience and expertise to optimize your investments in cutting-edge Microsoft technologies.

As the first US partner to achieve the Azure VMware Solution Specialization, we're uniquely positioned to support your digital transformation outcomes.

Washington Metro Area Transit Authority's journey to Azure

Driving culture change in the cloud

The Washington Metropolitan Area Transit Authority (WMATA) is the nation's third-largest transit authority, serving Washington DC and adjacent areas of Maryland and Virginia. WMATA sought to modernize its aging IT systems that was contributing to high maintenance costs and service disruptions.

Discovering a faster, cost-effective approach

WMATA chose AVS to simplify and accelerate its modernization efforts to a cloud infrastructure. With Presidio as its Microsoft partner, WMATA could quickly and confidently move its critical infrastructure to Azure. Aiming to deliver an excellent transit experience, WMATA now has a more secure foundation for further innovation.

RESULTS

Washington Metro Area Transit Authority realized significant benefits using AVS and ANF, including:

- High availability with 99.99% uptime SLA
- Streamlined its modernization efforts and migrated to Azure within 6 months
- Accelerated time-to-value with a less than 2-hour deployment

“When we got these applications over and employees could see the ease of use and access and how we can scale it up and down, everyone started clamoring to get their application into AVS or Azure data.”

Torri Martin, Senior Vice President and CIO, Washington Metropolitan Area Transit Authority

About Presidio

At Presidio, speed and quality meet technology and innovation. Presidio is a trusted ally for organizations across industries with a decades-long history of building traditional IT foundations and deep expertise in AI and automation, security, networking, digital transformation, and cloud computing. Presidio fills gaps, removes hurdles, optimizes costs, and reduces risk. Presidio's expert technical team develops custom applications, provides managed services, enables actionable data insights, and builds forward-thinking solutions that drive strategic outcomes for clients globally. For more information, visit www.presidio.com.
