

Modern Platforms

GCP Migration & Modernization

Organizations face increasing pressure to modernize legacy infrastructure while maintaining business continuity. Limited visibility into application dependencies, rising operational costs, security concerns, and skills gaps often turn cloud migrations into high-risk, slow-moving initiatives. Without a structured, data-driven approach, organizations struggle to prioritize workloads, control risk, and realize the full value of Google Cloud.

THE SOLUTION

Presidio's GCP Migration & Modernization methodology delivers a structured, low-risk path to migrate and modernize workloads on Google Cloud Platform. We combine deep discovery, application rationalization, secure GCP landing zone design, and wave-based migration execution to accelerate outcomes while minimizing disruption.

Our methodology supports a full range of migration patterns—from rehosting and replatforming to refactoring and cloud-native transformation—allowing organizations to migrate at their own pace while building a foundation for long-term optimization, analytics, and AI adoption on Google Cloud.

KEY BENEFITS

- ◆ Reduced migration risk through dependency-aware planning
- ◆ Faster time-to-value with repeatable, wave-based execution
- ◆ Improved cost transparency and optimization on GCP
- ◆ Secure, scalable GCP foundations aligned to best practices
- ◆ Flexibility to modernize incrementally over time

THE APPROACH

We deliver a proven, iterative migration lifecycle aligned to Google Cloud best practices. This approach combines automated discovery, dependency mapping, workload rationalization, and migration wave planning to reduce risk and improve predictability. Execution is delivered through repeatable migration pods and automation, enabling scale across large application portfolios while maintaining governance, security, and business alignment.

01 Strategy, Governance & Discovery

Assess Discover Strategy

02 Architecture & Automation

Mobilize Framework Architecture

03 Design, Plan & Build

Build Plan Validate Iterate

04 Execute Migration

Migrate Modernize

05 Continuous Optimization

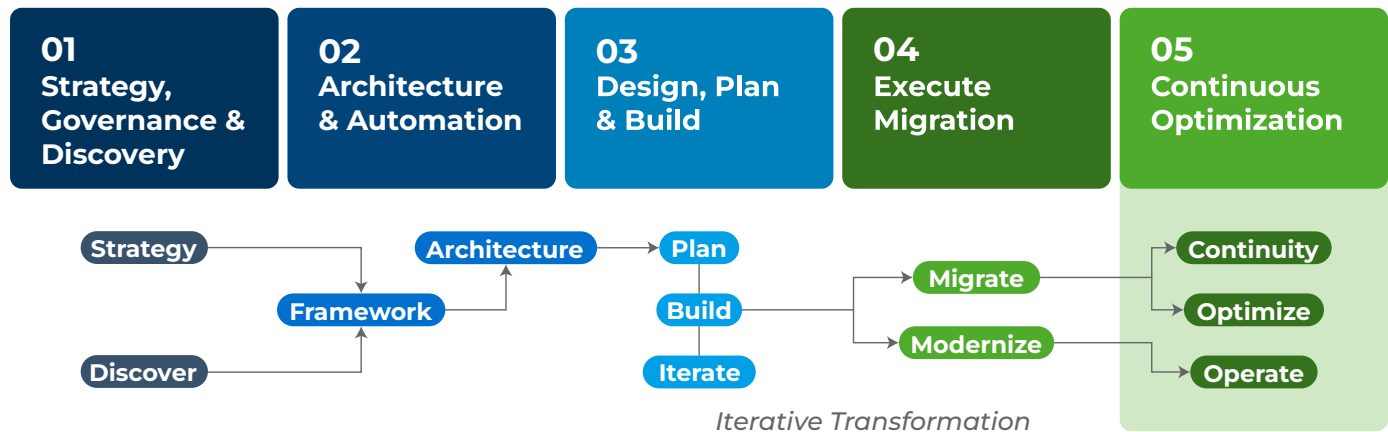

Optimize Operate Continuity

HOW TO GET STARTED

Begin with a focused discovery and assessment to establish a clear migration strategy, business case, and prioritized roadmap. From there, migration waves are executed iteratively—allowing organizations to build confidence, demonstrate value early, and scale modernization efforts on Google Cloud.

GCP Migration & Modernization

PRESIDIO CREDENTIALS

Presidio is an approved Google Services subcontractor - Premier Level Partner, holding the following authorizations with Google Cloud:

- ◆ Google Cloud Platform – Sell (Global)
- ◆ Google Cloud Platform – Service (North America)
- ◆ Google Chrome – Sell (North America and UK&I)
- ◆ Google Workspace for EDU – Sell (North America)
- ◆ Google Workspace – Sell (North America and UK&I)
- ◆ Professional Services Organization – Sell (North America)
- ◆ Google Public Sector Partner - Expertise

WHAT MAKES US DIFFERENT

Our approach to GCP migration and modernization blends strategic planning with hands-on engineering execution. We emphasize discovery-first migrations, realistic wave planning, and automation-driven delivery rather than one-size-fits-all lift-and-shift strategies. This results in fewer surprises, faster execution, and a migration foundation that supports continuous modernization—not just a one-time move.

WHY PRESIDIO

Presidio is here to guide your business transformation journey by helping you carefully navigate the fast-changing tech landscape. As the bridge between where you've been with foundational IT, and where you're going with modern AI and cloud services, we measure success with you on the terms you define. We strive to build lifetime relationships with each of our customers, and we do so by being fearless, fast, flexible, and compassionate. It's our mission to earn your trust and deliver innovative, high-quality outcomes at speeds once not thought possible, so you can achieve your business goals faster.

Start your Google Cloud migration with a structured, low-risk approach that delivers wins, secure foundations, and flexible modernization through discovery-driven planning and wave-based execution aligned to Google Cloud best practices.
