

Azure Rapid Migration Assessment

Plan your move to Azure with confidence. Through real-time performance data analysis, the Azure Rapid Migration Assessment identifies workloads ready for Azure and provides Total Cost of Ownership (TCO) estimates, governance insights, and strategic recommendations to help guide your cloud journey.

Who Should Participate

The Azure Rapid Migration Assessment evaluates your current environment and uses performance data to inform cloud strategy, workload planning, and modernization opportunities. Based on the assessment areas identified in the source, recommended participants include stakeholders responsible for infrastructure, applications, data platforms, cloud strategy, and governance.

Recommended Attendees:

- IT and Infrastructure Leaders
- Cloud and Azure Teams
- Application and Data Platform Owners
- IT Governance and Strategy Stakeholders

Workshop Topics

The following areas may be covered during the assessment:

- **Datacenter Modernization:** Evaluate opportunities to reduce costs, improve service levels, address end-of-life scenarios, and increase business agility.
- **Azure VM and Storage Profiling:** Analyze real-time server and application performance to inform cloud strategy and right-sizing decisions for virtual machines and storage.
- **Data Platform Modernization:** Review performance, virtualization architecture, and support timelines to help modernize the data platform and plan end-of-life transitions.
- **Cloud Economics:** Evaluate total cost of ownership for workloads targeted for Azure.
- **Governance:** Assess governance considerations using the Cloud Adoption Framework to identify opportunities for improvement.

Key Workshop Outputs

Gain actionable, data-driven insights through the following key outputs:

- Executive summary of data-driven findings
- Identification of workloads to move to Azure
- Total Cost of Ownership (TCO) analysis
- Cloud Adoption Framework governance analysis
- Strategic roadmap, recommendations, and next steps

Benefits of Workshop

The Azure Rapid Migration Assessment can help your organization:

- Gain a better understanding of opportunities to maximize TCO.
- Identify workloads ready to move to Azure using real-time performance data.
- Understand the Cloud Adoption Framework, relevant Azure services, and opportunities for improvement.
- Model scenarios to help save money and increase efficiency.
- Establish a strategic roadmap and recommended next steps for cloud migration and modernization.
