

Transform Your Data for AI Success

Your data is your biggest advantage, but only if it is ready for AI. Presidio's half-day Microsoft Fabric and AI Strategy Workshop gives your team a clear path to a modern, unified data platform in Azure. Led by our Data and AI Solution Architecture experts, this hands-on session turns possibility into a plan.

Bring your business and technical leaders together for one focused session. Define a shared data and AI vision, uncover the gaps holding you back, and leave with a prioritized roadmap that turns your goals into action.

Who Should Participate

Presidio's Data and AI Solution Architecture team facilitates the hands-on workshop in half a day, so your participation is vital.

Suggested attendees:

- Chief Data Officer (CDO)
- Line-of-Business Leadership
- Data Team Leaders and Engineers
- Enterprise and Data Architects
- Business Intelligence (BI) and Analytics Teams
- Information Security Teams
- Risk and Compliance Teams

Workshop Topics

The following topics are covered during the workshop:

- Organizational goals
- Data platform strategy
- Data management
- Data integration approaches
- Effective data governance
- BI/AI analytics

Key Workshop Outputs

Gain immediate value and insight through the following key outputs of the workshop:

- Strategic data and AI vision
- Foundational knowledge
- Security and governance
- Gap analysis and priority areas
- High-level roadmap

Benefits of Workshop

The workshop provides your leadership team with the following benefits:

- **Unified analytics platform:** Understanding Fabric's all-in-one analytics capabilities
- **AI and automation integration:** Leveraging Fabric's embedded AI and automation tools
- **Comprehensive data lake:** Using OneLake to consolidate organizational data
- **Flexible, cost-effective architecture:** Adopting Fabric's SaaS foundation for a pay-as-you-go model
- **Customized strategy and roadmap:** Receiving a tailored action plan to maximize Fabric's value aligned with business goals
