

Microsoft Fabric Workshop

Fragmented data platforms, rising costs, and limited AI readiness make it hard to modernize with confidence. In this one-day workshop, Presidio helps leaders explore how Microsoft Fabric can unify analytics, strengthen security and compliance, and support responsible AI, so business goals translate into one scalable, trusted, AI-ready data strategy.

Who Should Participate

This one-day workshop is for leaders and teams modernizing their data estate for AI. Presidio's Data and AI Solution Architecture team facilitates, and your participation is vital.

Suggested attendees:

- Chief Data Officer (CDO)
- Line of Business Leadership
- Data Team Leaders and Engineers
- Enterprise and Data Architects
- Business Intelligence (BI) and Analytics Teams
- Information Security Teams
- Risk and Compliance Teams

Workshop Topics

- **Modern Analytics Powered by AI:** How AI can augment the user experience for analytics using AI Functions, Copilot & Data Agents.
- **AI Agents with Trusted Data:** Understand how Microsoft Fabric supports the broader AI Ecosystem, AI Foundry & Copilot Studio.
- **Unified Analytics Platform:** Fabric's all-in-one analytics capabilities, combining data integration, engineering, AI and BI.
- **OneLake and Data Security:** Explore how OneLake brings organizational data into one logical data lake and how OneLake security protects it.
- **Fabric Architecture and Cost Models:** Review Fabric's SaaS foundation, pay-as-you-go pricing and options for simplifying infrastructure management.
- **Roadmap Planning:** Prioritize recommendations and map the steps, timelines and effort for your modernization plan.

Key Workshop Outputs

Gain immediate value and insight through the following key outputs of the workshop:

- Business alignment of high-level goals and objectives with Microsoft Fabric, AI, modern data architecture patterns and approaches.
- Recommendations for data and AI tools and platforms that focus on key areas of need.
- Actionable recommendations for implementing a data and AI estate modernization plan.
- Identify gaps between current capabilities and desired state.
- Strategic roadmap outlining the steps, timelines, and effort required for each recommendation.

Benefits of Workshop

Participants and the organization will gain immediate value and insight, including:

- High-level assessment of current data estate, AI & data technologies, and capabilities within the organization.
- Understanding of the AI and data infrastructure and technologies available to modernize your environment and grow with the business.
- Options to provide better analytics, data science, generative AI, and Business Intelligence (BI) capabilities.
- Improved awareness and knowledge to optimize data storage and processing costs.
- Practical approaches to apply data governance within the modern platform's data management functions.
