PRESIDIO®

SOLUTION BRIEF

PRESIDIO® Lighthouse
Agentic AI Accelerator

A vendor-neutral harness for scaling agentic AI.

THE CHALLENGE

Agentic AI is moving from experimentation into enterprise workflows, but scaling remains difficult. Without reusable capabilities and a shared operating model, IT and development teams repeatedly rebuild orchestration, integrations, and other foundational components.

Connecting agents securely to enterprise data, applications, APIs, and workflows requires significant custom effort, while gaps in governance and cost visibility make AI difficult to trust, manage, and scale. Projects often struggle to stay aligned with business outcomes, making ROI difficult to demonstrate.

WHY IT MATTERS

Agentic AI is quickly becoming part of how enterprises operate, and every stakeholder needs a fast path from pilot to production. Our Agentic AI Accelerator is a vendor-neutral agentic AI harness that helps you create, connect, govern, and scale agents, without spending months building it yourself. The value shows up differently across the organization.

- **The CIO**
  Reduces AI infrastructure risk and cost by orchestrating agents across the business, keeping flexibility across cloud, hybrid, and on-premises environments.
- **The CTO**
  Shortens time to value by accelerating production and delivery of agents, so AI investment starts paying off sooner.
- **The Engineering Leader**
  Helps teams hit roadmap commitments faster, while eliminating unnecessary rework on integration and orchestration.
- **The COO**
  Drives operational excellence by improving employee productivity and customer experience through faster, more consistent decisions.

THE SOLUTION

You own what we build, retain flexibility across models and deployment environments, and can add managed services when ongoing operational support is needed. The result is a services-led approach to agentic AI that accelerates the path to production while giving organizations greater control over architecture, cost, and long-term evolution.

KEY BENEFITS

- **Get Agentic AI Into Production Faster**
  Use reusable agentic capabilities to move priority use cases from experimentation to production faster.
- **Connect AI to the Way the Business Works**
  Integrate agents with enterprise applications, data, APIs, and workflows so AI operates within existing business processes.
- **Govern and Operate AI at Scale**
  Manage users, roles, permissions, workspaces, usage, budgets, model access, and safeguards through enterprise-ready controls designed for AI at scale.
- **Keep Flexibility and Ownership**
  Support multiple models across cloud, hybrid, and on-premises deployments while retaining ownership of custom capabilities and IP.

PRESIDIO®

Agentic AI Accelerator

HOW IT WORKS

The engagement begins by identifying a high-value business workflow and the enterprise context required to support it. We work with you to map the agents, data, applications, APIs, tools, and governance requirements needed to turn the use case into a production-ready capability.

From there, teams build and orchestrate intelligent agents using reusable templates, skills, tools, memory, code execution, subagents, and orchestration. Agents are connected to the systems and knowledge they need, while enterprise controls establish users, permissions, model access, safeguards, usage visibility, and budgets.

As adoption expands, the same harness can be reused across additional workflows and practice areas. You can choose the right model and deployment environment for each need, while Presidio provides implementation expertise and optional managed services to support ongoing operations.

WHAT MAKES US DIFFERENT

- **Outcome and Accountability, Not Software**
  Customers get a services-led engagement, not a software license. Presidio combines the Agentic AI Accelerator, PATH infrastructure, advisory, and optional managed services under one accountable relationship, backed by 20+ years of expertise.
- **Flexible by Design**
  Run the right model in the right environment. Presidio supports frontier, BYOM, and open-source models across cloud, hybrid, and on-premises PATH deployments, reducing vendor lock-in and helping customers control costs and adapt as needs evolve.
- **Cost Control**
  Give leaders visibility into AI spend, adoption, and efficiency at the individual, team, and enterprise level, with controls to optimize costs across models and vendors.
- **Enterprise-Wide Scope, Not a Point Solution**
  The Agentic AI Accelerator spans the full agent lifecycle across practice areas, helping organizations run one scalable agentic AI harness rather than stitching together point tools for every job.
- **Proven at Scale**
  Presidio built the Agentic AI Accelerator by using it ourselves first. Within its first year of deployment, the platform was adopted by 1,900+ employees, delivered 55+ releases, processed 190B+ tokens, and achieved a 31% reduction in AI session costs.

WHY PRESIDIO

Presidio is here to guide your business transformation journey by helping you carefully navigate the fast-changing tech landscape. As the bridge between where you've been with foundational IT, and where you're going with modern AI and cloud services, we measure success with you on the terms you define. We strive to build lifetime relationships with each of our customers, and we do so by being fearless, fast, flexible, and compassionate. It's our mission to earn your trust and deliver innovative, high-quality outcomes at speeds once thought not possible, so you can achieve your business goals faster.

Ready to Put Agentic AI to Work?
Start with a high-value workflow aligned withPresidio brings together the integrations, capabilities, and controls needed to build and expand it.

Through a discovery or co-innovation session, we'll turn that opportunity into a clear plan for an agentic capability built around your business.
