PRESIDIO®

SOLUTION BRIEF

PRESIDIO® Lighthouse PATH Stack

One governed operating layer for enterprise AI.

THE CHALLENGE

AI is moving from pilots into production, but many enterprises still struggle to operationalize it across multiple environments, vendors, and platforms. While teams can prove AI works in isolation, scaling it across on-premises, cloud, colocation, neo-cloud, and edge quickly becomes an operational challenge—not just a technology one. Innovation begins to outpace IT, teams spend more time managing infrastructure than delivering business value, and leaders face growing pressure to balance speed with governance, security, and cost.

WHY IT MATTERS

The shift from AI experimentation to enterprise adoption affects every stakeholder differently. PATH Stack helps organizations establish one governed operating model that gives IT, developers, security teams, and business leaders the confidence to innovate faster while maintaining control, flexibility, and long-term value.

- **The CIO / Infrastructure Leader**
  One governed operating model instead of a patchwork of platforms, with fewer vendor relationships to manage and more consistency across the enterprise.
- **The AI / Platform Engineering Team**
  A repeatable path from prototype to production that lets teams develop and deploy without spending their time managing plumbing.
- **The Security & Compliance Leader**
  Governance, auditability, and control built into the operating model so AI can move fast without moving outside the guardrails.
- **The Finance Leader**
  Greater visibility into utilization, cost, and workload placement so AI spending becomes more predictable, explainable, and defensible.

THE SOLUTION

PATH Stack is Presidio's AI operating system—a managed framework, not a product—designed to help enterprises develop, run, and move AI workloads across on-premises, cloud, colocation, neo-cloud, and edge environments. Anchored in Presidio's Clarify → Realize → Scale methodology, PATH Stack provides one governed operating layer spanning infrastructure through the application layer, enabling organizations to standardize AI operations while preserving flexibility.

Instead of managing disconnected AI platforms and fragmented governance, PATH Stack provides a consistent foundation for enterprise AI. Teams can develop, deploy, and move workloads where they make the most business sense while maintaining governance and consistency. The result is an infrastructure-agnostic operating model that accelerates production AI and helps organizations scale confidently.

KEY BENEFITS

- **From Experimentation to Enterprise Adoption**
  Give business teams a repeatable path to scale successful AI initiatives instead of leaving them trapped in pilot mode.
- **Freedom Without Friction**
  Development teams gain the freedom to innovate while IT maintains the consistency, governance, and support the enterprise requires.
- **Run AI Where It Makes the Most Sense**
  Move workloads based on economics, latency, data residency, or capacity needs without redesigning the stack each time.
- **Confidence in Every AI Investment**
  Executives get greater visibility into AI operations, costs, and governance, making it easier to justify investment and expand adoption.

PRESIDIO®

PATH Stack

HOW IT WORKS

PATH Stack starts by establishing a governed foundation, so leaders can see how AI runs, what data it touches, who is accountable, and what it costs before they scale. From there, Presidio helps organizations validate and prioritize use cases, moving priority workloads from sandbox to production readiness through infrastructure testing, cost modeling, and guidance. Once those workloads are ready, PATH Stack extends AI into enterprise workflows so teams can run, move, and optimize AI across environments without rebuilding the stack every time the business changes.

The orchestration layer brings together the best of Presidio and the broader ecosystem so enterprises can standardize the foundation while preserving flexibility above it. That means teams can move fast, stay governed, and keep AI aligned to business needs as workloads evolve.

WHAT MAKES US DIFFERENT

- **One Foundation. Endless Possibilities**
  PATH Stack replaces disconnected point solutions and fragmented infrastructure with a single unified delivery framework.
- **Open by Design. Flexible by Choice.**
  Customers retain the flexibility to adopt new technologies and deployment models without rebuilding their AI foundation.
- **Innovation with Governance Built In**
  Organizations can accelerate AI adoption while giving leadership confidence that security, compliance, and accountability remain intact.
- **Built for Long-Term Transformation, Not One Deployment**
  PATH Stack establishes a repeatable operating model that helps enterprises continue evolving their AI strategy as technology and business priorities change.

WHY PRESIDIO

Presidio is here to guide your business transformation journey by helping you carefully navigate the fast-changing tech landscape. As the bridge between where you've been with foundational IT, and where you're going with modern AI and cloud services, we measure success with you on the terms you define. We strive to build lifetime relationships with each of our customers, and we do so by being fearless, fast, flexible, and compassionate. It's our mission to earn your trust and deliver innovative, high-quality outcomes at speeds once thought not possible, so you can achieve your business goals faster.

Ready to Build Your Enterprise AI Operating Model?
Whether you're moving beyond AI pilots or modernizing hybrid infrastructure, PATH Stack provides a governed foundation to scale AI with confidence. Through a PATH Stack workshop, Presidio will assess your AI environment, identify opportunities to simplify operations and accelerate production, and develop a roadmap aligned to your business goals—or schedule a live demonstration to see PATH Stack in action.
