AI Technical Workshop

Know if your foundation is ready.

The AI Technical Workshop is a facilitated 4-hour workshop that gives organizations a shared, honest, vendor-neutral view of where their AI capability stands, assessed across the TOGAF baseline architectures (Business, Data, Application, Technology) plus Governance. It answers the question that gates every AI build: is the plumbing ready, and if not, what should be fixed first?

Most enterprise AI pilots stall before reaching production because of architectural gaps, not model quality. This workshop surfaces those gaps early, before capital is committed to GPUs, platforms, or a build.

WHO SHOULD PARTICIPATE

The workshop brings together business, technical, and governance leaders to align on AI readiness and key gaps.

- **CIO / CTO:** Understand the technical gaps that could affect AI investment and delivery
- **Chief Data / AI Officer:** Assess data and AI readiness across the organization
- **Lead / Enterprise Architect:** Get a shared view of architectural gaps and priorities
- **Platform & Infrastructure Owner:** Identify infrastructure requirements and constraints before scaling
- **Head of Data & AI Engineering:** Connect engineering requirements to the path toward production
- **CISO / Risk & Compliance:** Surface security, governance, and compliance requirements early

KEY WORKSHOP OUTPUTS

- **Participant Workbook:** Structured findings across all five dimensions
- **Recommendations Summary:** Directional recommendations for priority gaps
- **Ranked Gap List:** Prioritized gaps with rationale
- **Three-Horizon Roadmap:** 0–3, 3–9, and 9–18-month priorities with owners
- **Workshop Readout:** Executive summary of findings and recommendations
- **Next-Step Recommendation:** Recommended follow-on engagement

WORKSHOP TOPICS

The workshop examines the architecture and governance factors that determine AI readiness for production.

- **Business Architecture:** Connect AI use cases to business capability and value
- **Data Architecture:** Assess data readiness, quality, access, pipelines, and RAG substrate
- **Application Architecture:** Review model serving, gateways, integration, and agent frameworks
- **Technology Architecture:** Assess compute, storage, network, orchestration, and cloud posture
- **Governance Overlay:** Review security, data handling, observability, and auditability
- **Current-State Capture:** Build a shared view across all five dimensions with technical stakeholders
- **Gap Identification:** Identify and rank gaps by impact

WORKSHOP BENEFITS

- **Avoid Stranded Investment:** Prevent spending on GPUs or platforms before the organization is ready
- **Faster Path to Production:** Surface and sequence the technical gaps blocking progress
- **Faster Decision-Making:** Replace extended technical debate with a ranked, owned plan
- **Vendor-Neutral Assessment:** Provide an independent view without vendor-driven bias
- **Shared Understanding:** Align technical and business leaders on the current state
- **Defensible Next Step:** Sequence follow-on investment based on identified gaps

ABOUT PRESIDIO LIGHTHOUSE

We understand the AI journey because we've walked it ourselves. Presidio AI Studio gave us firsthand experience adopting, governing, and scaling AI, with 1,500+ employees enabled with agentic workflows, 92B+ tokens processed, and a 31% reduction in session costs. That experience shapes how we advise customers before proposing technology.

Presidio Lighthouse builds on that foundation, combining deep AI expertise with a commitment to real outcomes. We work alongside customers throughout their journey, aligning people, process, and technology to clarify priorities, build the right architecture, implement solutions, and support scale.

Presidio Lighthouse Advisory holds that alignment together across business stakeholders, IT architecture, Presidio delivery teams, and managed services, keeping everyone focused on shared outcomes, measuring results, and using those insights to determine what comes next.

OUR AI POINT OF VIEW

When you partner with Presidio, we show you where AI creates value, how organizations should build and govern AI, and how to scale it safely. Start anywhere.

- **Clarify**
  Find where AI creates value. Prioritize the highest-impact cases.
- **Realize**
  Ship AI that works for you. Governed, deployed, and built for your data.
- **Scale**
  Roll AI out across your organization without losing control.

WHY PRESIDIO

Presidio is here to guide your business transformation journey by helping you carefully navigate the fast-changing tech landscape. As the bridge between where you've been with foundational IT, and where you're going with modern AI and cloud services, we measure success with you on the terms you define. We strive to build lifetime relationships with each of our customers, and we do so by being fearless, fast, flexible, and compassionate. It's our mission to earn your trust and deliver innovative, high-quality outcomes at speeds once thought not possible, so you can achieve your business goals faster.

Align your AI strategies today with Presidio.
Most AI initiatives stall for organizational reasons, not technical ones. Presidio's workshops align strategy, operations, and architecture upfront, turning AI ambition into a clear roadmap. Sessions like AI Priorities Workshop, AI Future Visioning, and AI Governance Strategy focus efforts aligned to your business outcomes.
